PANAMA CANAL AND BOGEY MAN.

I had always heard of the Chagres river as the imposing and tremediable difficulty which rendered this route impracticable for a canal, and I now feel much astonished that any engineer should have lent his voice to confirm such an opinion. The Chagres, even in time of flood, is a comparatively small stream; it is crossed by the railroad on a bridge 625 feet long, obstructing the channel with five heavy piers, yet this bridge has stood there about fifty years. Below the railroad there are no tribu-taries which increase its volume sensibly; it flows through a rather wide val-ley where there is plenty of room for it and for the canal. Since the resumppendent channels for the discharge of this river have been provided, parts of old bed being occupied by the Of course, in its upper portion this river is a mountain torrent, and it must be provided for in time of flood, so that it may not overflow into the canal. The present scheme of the canal company, to control both the upper and the lower reaches of the river by two dams, seems a good expedient; the upper artificial lake will afford a permanent supply of water for the higher levels of the canal and the lower lake will form an integral part of the navigable canal. It would have been quite as reasonable for oppo-nents of the Erie canal to have argued that the Mohawk river would render the Erie canal impracticable as it is now to express a fear of the Chagres as

A SHARP DECLINE TODAY. TOMORROW IS DIVIDEND DAY.

The Silver King and Swansea will Distribute \$80,000.

THE SHOEBRIDGE-BONANZA.

North East Drift is Improving - Operations at the Chaiaman-Copper

Boom at Ely, Nevada.

Checks for \$80,000 were being made out today in payment of the Swansea and Silver King dividends due tomorrow. The Swansea of Tintic distributes the regular 5 cents a share, or \$5,000, which has been handed out with clock-like regularity for many months past, while the Park City bonanza will gladden the hearts of its fortunate owners by the payment of its regular monthly dividend of 50 cents a share, or \$75,000. On the 15th inst the Daly West of Park City will come forward with 25 cents a share, or \$37,500, the books of which

company closed today. It is stated semi-officially that the Mammoth will hand out \$40,000, or 10 cents a share, about March 1st. Forecasts regarding the Grand Central entering the dividend column, have proved so delusive that the oracles are now silent on the matter, but it is confi-dently expected that the Petro will again distribute a little of the where-

withal in May. Nothing is known regarding the Sacramento further than that an official of the company said recently that it is in shape to resume the payment of divi-The statement is made by one who ought to know that the Bullion-Beck will resume the payment of dividends within 90 days, and rumors are affoat that the Centennial-Eureka will pay a dividend of \$100,000 in April. In spite of the fact that so many

dividend payers have temporally pended their periodical distributions, Utah's record for the year amounts to \$527,400. This does not include the immense sums taken out of the ground in the past 10 weeks by Capt. De Lamar. Jesse Knight, the Packard-McChrystal combination, and the Highland Boy

NEWS FROM NEVADA CAMP. W. H. Jenkins Talks of Chainman and Other Ely Properties.

W. H. Jenkins, who has been representing the American Cyanide company at Ely, Nev., since last June, returned to the city yesterday, and after spending a few days here will resume his journey to Denver, the headquarters of his firm. Mr. Jenkins has had charge of the cyanide process at the Chainman mine, in the Nevada camp. The com-pany has been operating a 15 ton mill which, in spite of the fact that the ores are refractory and difficult to treat, has paid the working expenses of a force of 17 men. About five of this number have been engaged in the mill and extracting ore, the balance being kept at development work. Through their efforts a big body of ore has been blocked out for the new mill, which the company is figuring on building this year. The ore is low-grade, running from \$5 to \$10 a ton. The average value of ore treated during the six months ending December, 1899, was shown to be about \$7, some of which

was in silver. The shaft is down 300 feet altogether. but as there is about 70 feet of water in the shaft, only the ground above the water line, or above the 200 level, is being prospected. The tapping of water so near the surface affords a plenti-ful supply of water for milling pur-poses though the supply of oxidized ore is doubtless curtailed thereby, at least as regards depth. The veins are re-ported to be fissures and quite large in The levels are being explored and the ore from different parts of the mine renders changes necessary in the strength of the solution from time to time. The slimes prevent extraction, as the ore is of a very clayey nature, It is crushed dry, and after being cyanided, the amalgamators are pressed into service to collect the free gold

which is found in the ore, Mr. Jenkins reports quite a copper boom in the district around Ely. West camp, about six miles from Ely, a company is developing a big copper property of great promise. A shaft has been put down and cross-cutting is now going on, though on account of the wa-ter, the work has been somewhat de-

Preparations are also being made to ship some high-grade copper ore from another property near Ely. A great deal of sulphide ore has been extracted. The difficulty of getting it to market prevents the handling of anything but

the very best of the ore.

The Ely Mining company's property is said to be looking very well since Mr. Marks took hold of it. He is keep. ing a good force of men at work all the time and the ground for the new mill will be broken as soon as spring opens

HAILEY MINES.

Harry T. Bragdon Predicts a Boom for the Idaho District.

Harry T. Bragdon, the mining man who left Monday after spending a week here looking into the probabilities of this region, said that there is no doubt that many mine promoters will be coming here soon, says the Hally Times. "They are booming Eastern Oregon, just now," he said, "but they intend to come here. They are after your quality of ore-ore that nets them about \$1,-000 a carload, in any market in the world. That beats any but the richest, e highest grade gold are.

Your formation here is similar-slate

"Your formation here is similar—slate intrusions, faulting and all—to that at Sandon, British Columbia, There they have to may the tariff of 1½ cents a pound, or \$30 a ton, yet they make big money because the ore averages \$112 a ton. Here you have no tariff to pay—hence you get a sort of bonus of \$30 a ton, and your ore averages \$125 a ton.'

THE SHOEBRIDGE BONANZA. Property is Improving but Depth is

Needed to Secure a Mine. Manager H. G. Heffron received word today from Superintendent Wm. Car-ruthers of the Shoebridge Bonanza that the vein on the northeast drift off the 400-foot level is now 5 feet wide and that swells and bunches of ore are comnow to express a fear of the Chagres as an obstacle to the construction of a canal through the isthmus.— Charles Palne, in The Engineering Magazine for February tendent's report startling in its nature. | -Collier's Weekly.

it is nevertheless cheering. The Super intendent says the mine never looked better than it does at the present time. It is believed that the main fissure of the big stope will be encountered. No assays have been made of the ore which appears to contain lead and copper and iron pyrites. Some of the best ore is being dumped in the shaft house, while the other grades are being run through

the jigs.

While an improvement is noticed,
Manager Heffron does not believe the
Manager Heffron does not believe the Manager Heffron does not believe the ore will much more than pay the cost of extracting and shipping. Work will be continued, however, on the 450-level, which is expected to show better values and afford some stoping ground. The superintendent's letter was encouraging throughout, but Col. Heffron does not articipate a mine being opened up. not anticipate a mine being opened up until greater depth is secured, which it will be the aim of the management to obtain as quickly as possible.

MINING NOTES.

Five cars of ore were on the market today from the Mammoth of Tintic.

Two cars of ore from the May Day of Tintic were on the market today. The South Swansea of Tintic reported on the market today with 3 cars of

Stockton was represented on today's market by a car of ore from the West Argent.

Harvey J. Jones of the Conklin samp-ler returned last evening from a short trip to Ophir.

The Taylor Brunton sampler reported cars of ore from Tintic today, and 2 from Bingham.

Thomas W. Jendings is expected back from his trip to the Grand Gulch mine in Arizona tomorrow. The Conklin sampler reported 5 cars of ore from Tintic, 1 from Stockton and a small lot from Nevada today.

The Dexter mine of Tuscarora, Nevada, reached the sampler today with a small shipment of high grade sulphide ore which it is believed will run about

G. S. Holmes, of the Knutsford hotel; W. H. Nutting, O. P. Posey and Mana-ger H. G. Heffron, visited the Bingham Gold and Copper company's property in Bingham yesterday. C. W. Miles, who is associated with

Frank Moorehouse in the option se-cured on the Midas property in the Clifton district, left for the property last evening. Manager W. B. Andrews of the Shawmut Mining company left last evening for Colorado. From there Mr. An-drews will go to Boston to consult with

he officers at that end of the line and will return in about two weeks. The recently organized Imperial Copper Mining company, of which A. B.

Lewis is president, is preparing to run a tunnel on their property at Frisco, to open up a copper vein from which shipments of copper have been made, averaging 16 per cent. Everyone will wish Col. A. B. Hayes and others, who are opening up the onyx quarries near Ogden, the greatest success in the venture. The onyx has been pronounced equal, if not superior, to the best from other climes, and its successful development will mean much

Grand Valley Times: Mr. Young, a mining engineer from Salt Lake City, came in Wednesday and left, for Mill Creek Thursday morning to make the final survey for a patent on the Emma T., Lillie B., Katie D. and Colorado group of claims, owned by Tully, Lind

The Uvada correspondent of the De La Mar Lode, writing from that point Two Salt Lake gentlemen are going to sink a shaft 100 feet deep near the Summit station, or about eight miles from here. From what can be earned they have a good showing for a big mine, which seems almost too good to be true.

It is rumored that the drift off the 900 level of the Grand Central has intercepted the ore chute which has been explored almost to that level by a winze. The encountering of the chute on this level can hardly be loked upon in the light of a new discovery, but it will mean a big step forward in the mine's development.

MACHINE TOOLS IN SWITZERLAND The efficiency of the Swiss workshops

The efficiency of the Swiss workshops stands fully as high as the standard of design. The American system of specialisation of workmen and of tools has not reached such a marked application as in America itself, although many tools brought direct from that country are in use. In one respect, however, progress has been made, namely, the use of machine tools of heavy capacity, driven to a rate of production fully as driven to a rate of production fully as great as in America. In this respect an important change is evident.—Engineering Magazine.

WHEN EXTREMES MEET.

Editor-in-Chief-"I understand young Bluegore, the millionaire's son, has gone in for journalism? City Editor-Yes. He's on my staff. Editor-in-Chief-And what do you think of him? City Editor-Well, he's a unique fig-

ure in journalism. Editor-in-Chief-You don't say? City Editor-Yes. He's at once the richest and poorest reporter in the city.

Cold Cure will break up any form of cold in a few hours and prevent griepe, diphtheria and pneumonia. It should be in every bonic and every vest pocket. It is better than a life insurance policy. MUNYON.

St. Louis, Mo.

Horses Kick in self-defence. It is their most vigorous form of protest against the abuse of Split Nails shat are driven into their feet to hold on their shoes. Blacksmiths often use such nails in ignorance of the dasger that is liable to follow.

Shearing Process

by which the fibres of metal are separated and can often be pried spart with the finger-nail. This kind of a nail can be easily distinguished by the rough edge along the sides near the point. Putnam Nails

are exclusively Hot-Forged and Ham-mer-Pointed, precisely like the old-fashioned hand-made nail. This process welds all particles of iron closely together

Absolutely Safe. Examine the nails in your smith's sheeting box. If their edges are smooth for the whole length here are the Hot-Forged Putnam. If they show mark of the shears near the point, avoid them; they are cold-rolled and dangerous.

Mascot ring, nickel plated, mailed on receipt of ten cents, in stamps or silver. PUTNAM HAIL COMPANY, Neponset, Beston, Mass.

Por sale by Z. C. M. I., Clark, Eldredge & Co., Salt Lake Hardware Co., and George A. Lowe, Salt Lake City,
